

- Incorporate the data and feedback into Tier 1 planning.
- Use the data to highlight community celebrations.
- Use the data to focus on areas of growth within the school community.
- Use data to create targeted interventions to build on school plan goals.

Responding to the Data

- Share the data with your stakeholders; School Staff, Students and Families.
- Obtain feedback around the data trends.
- Assess what steps were beneficial during pre-administration to increase buy-in and participation.

Presentation

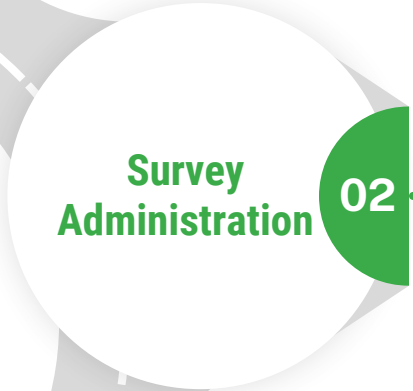

ROADMAP TO SUCCESS

Student Well-Being Survey

Survey Pre-Administration

- Communication around survey administration expectations.
- Building buy-in and understanding of importance.
- Get families involved in the process.

Survey Administration

- Implement systems for robust participation.
- Manage administration logistics.
- Support staff and students in completing the survey.
- Participation can be tracked down to homeroom, during the open windows

Data Analysis & Interpretation

- Use QLIK to identify trends in the data.
- Prepare data to be shared with teaching staff, students and families.
- Teachers can use the data snapshot to present to students during community meeting times
- The community meeting structure works well for each phase of implementation.
