Page Setup Stepper

Setting up a basic page and adjusting the layout.

1	Located on the left side of your dashboard, hover over 'Pages' and select, 'Add New'.	 M Add New Page Add New Page Hola! Would you like to receive automatic updates and unlock premium support? Please activate your copy of WPBakery Page Builder. Add New Pages Add New Enter title here Pages Add New Comments Lists Alerts Alerts TablePress Appearance Plugins Users Tools WPBakery Page 	e Dra tatus isibil ublis Attu pare ault
2	Enter a page title at the top.	Add New Page Enter title here	
3	You can now use the main editor to add or edit content on that page.	Image: Add Media Add Button Image: Add List Image: Add Form Visual Tere Paragraph B I Image: E <	

4	When you have added the necessary content, on the right side, click, 'Save Draft'. If you're ready, you can also publish the page immediately. *Publish does not mean that the page will automatically be placed in the menu. That will be shown in another stepper. However, once you publish a page, it can be found via a search on your website.	Publish Save Draft Preview Status: Draft Edit Visibility: Public Edit Publish immediately Edit				
5	If you have not done so, you may be prompted to select your page layout. This is also where you can add in an introduction that will overlay over your page image.	Page Use these fields to customize the individual page template. Layout* Choose the layout you would like to use for the page. Default Sldebar Content Blocks Obs(Full-Width) Introduction Use this field to add an introduction to the page. If there is an image, the introduction will appear on top of the image.				
6	You can add an image from your previously populated media library.	Featured Image Set featured image				

7	When you are finished, click on the 'Publish' or 'Update' button on the	Publish	*
	right side bar.	 Status: Published Edit Visibility: Public Edit Published on: Sep 14, 2017 @ Move to Trash
